SLA-LENS Classroom Diagnostic Report

Deterministically generated from the supplied annotated transcript. All counts are row-based unless explicitly stated.

Instructor: Instructor1

Learners (4): Student1, Student2, Student3, Student4

664 Transcript rows	**221** Learner rows	**443** Instructor rows
101 Feedback-marked rows	**54** Error-marked rows	**4** Uptake-marked rows

Reading this report

> Labels are model/human annotations supplied in the input, not independently verified facts. Sequence associations are proximity-based candidates, not confirmed pedagogical or causal links. Repeated timestamps make exact speaking-time estimates unreliable. No claims about learning gains, feedback effectiveness, or missed teaching opportunities are inferred.

Session and data quality

Measure	Value
Unknown label rows	18
Multi-label rows	17
Approximate word count	4207
Duration from transcript endpoints (minutes)	36.3

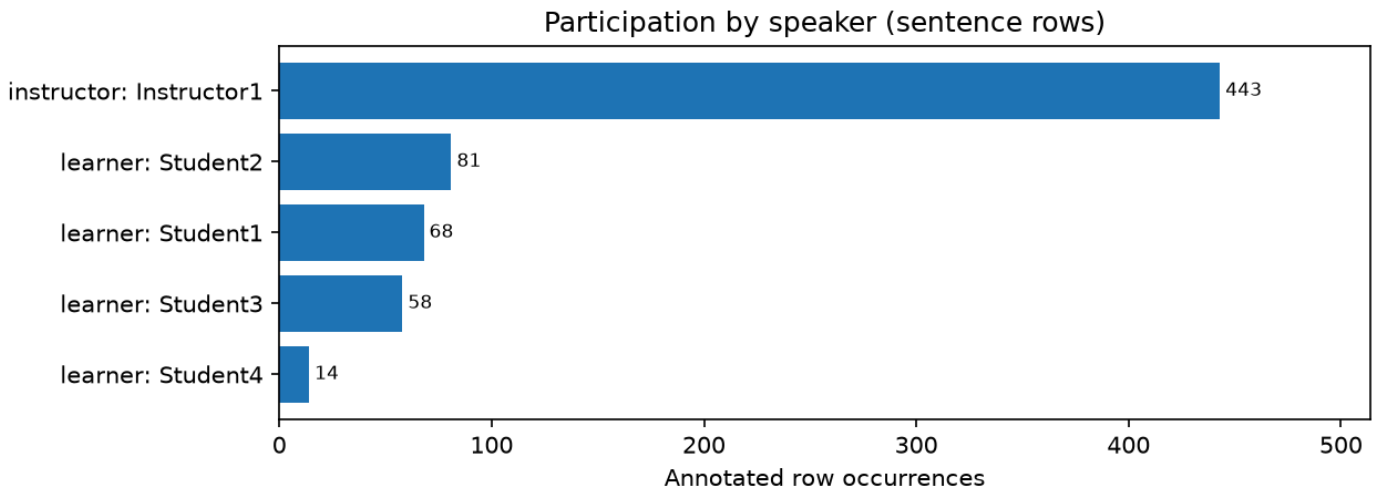

- Timestamp intervals repeat across sentence rows; row counts are not speaking time.

Candidate interaction sequences

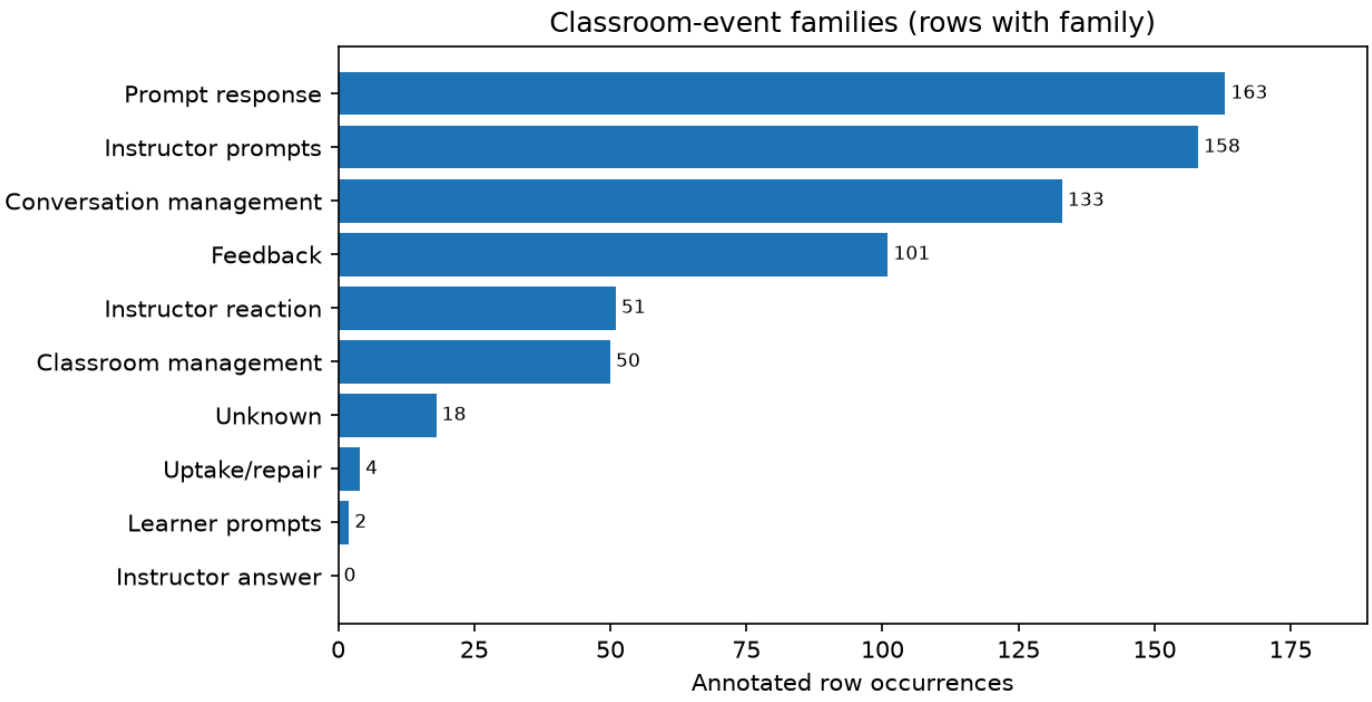

Rule: find the first target event within 4 intervening rows, stopping at another source event. These are candidate associations only. See sequence_links.csv and evidence_index.csv for full provenance.

Measure	Value
Error To Corrective Feedback	6/54 source rows have a candidate within 4 intervening rows
Feedback To Uptake	4/101 source rows have a candidate within 4 intervening rows
Prompt To Prompt Response	51/158 source rows have a candidate within 4 intervening rows

Feedback strategies

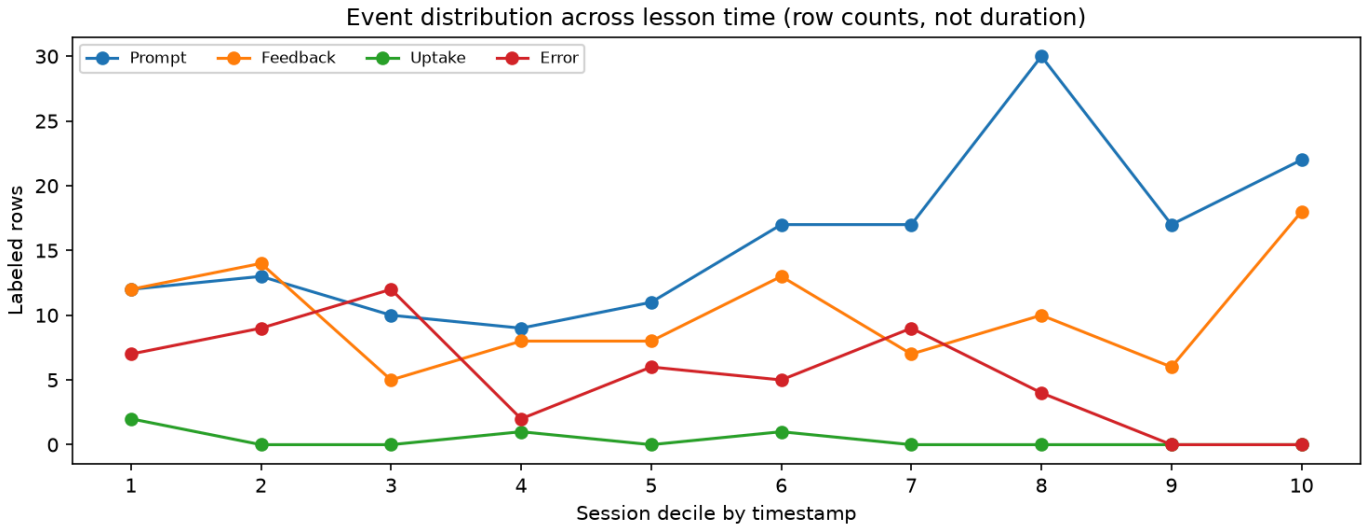

Learner error categories

Uptake outcomes

Timeline

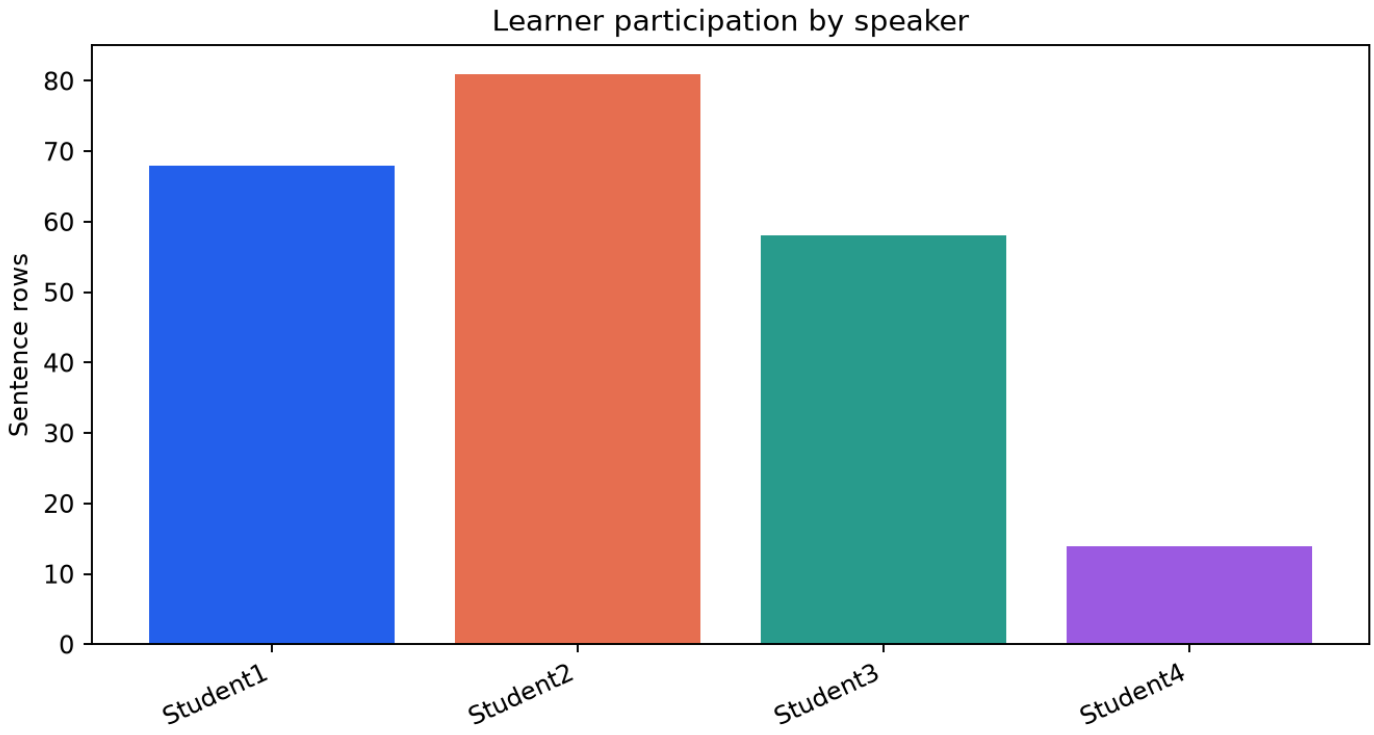

The lesson is divided into 10 equal time intervals (1 = beginning, 10 = end). Each line counts sentence rows tagged as Prompt, Feedback, Uptake, or Learner Error within that interval. Higher points mean more tagged rows, not more speaking time. These counts do not establish learner progress or feedback effectiveness.

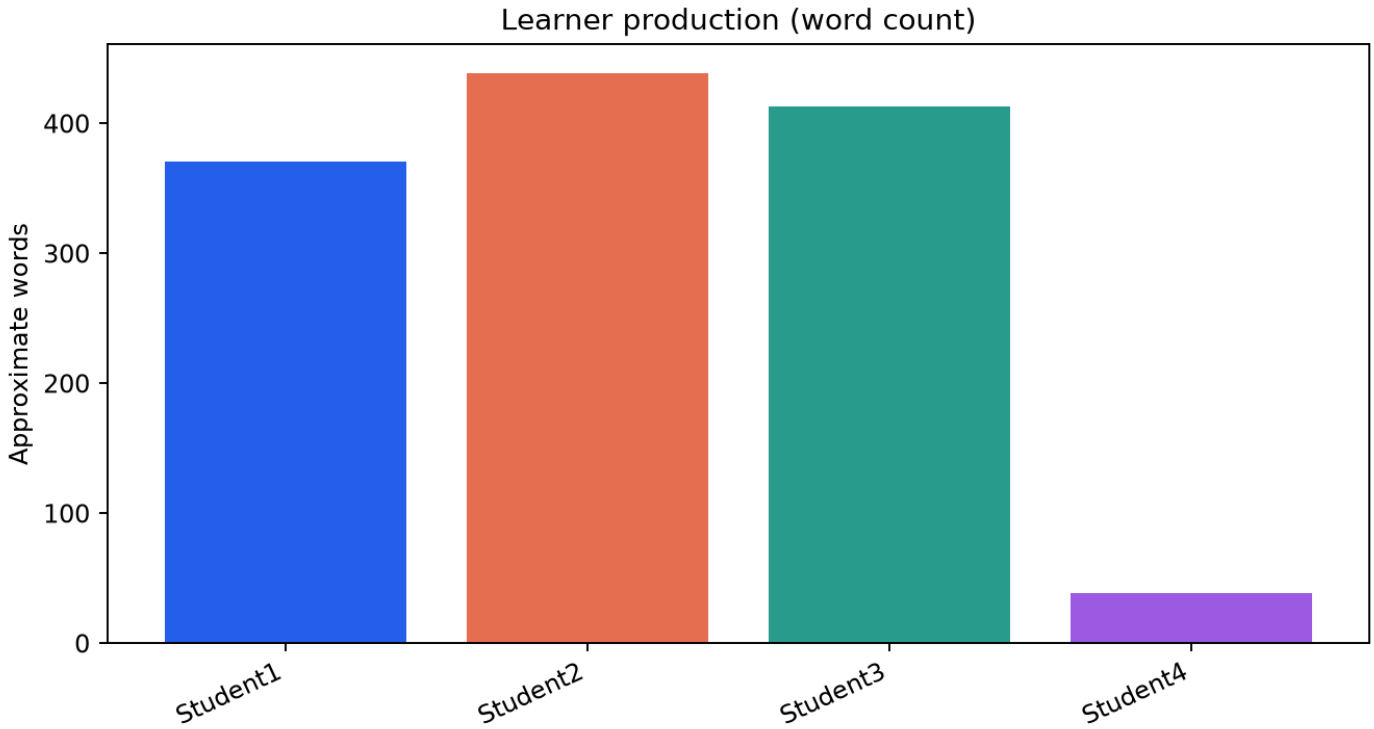

Learner-level diagnostics

Speaker names are grouped case-insensitively. Error incidence is the proportion of each learner's rows with an error label, not an assessment of proficiency. Counts reflect annotations, and reading aloud or task differences may affect comparisons.

Production

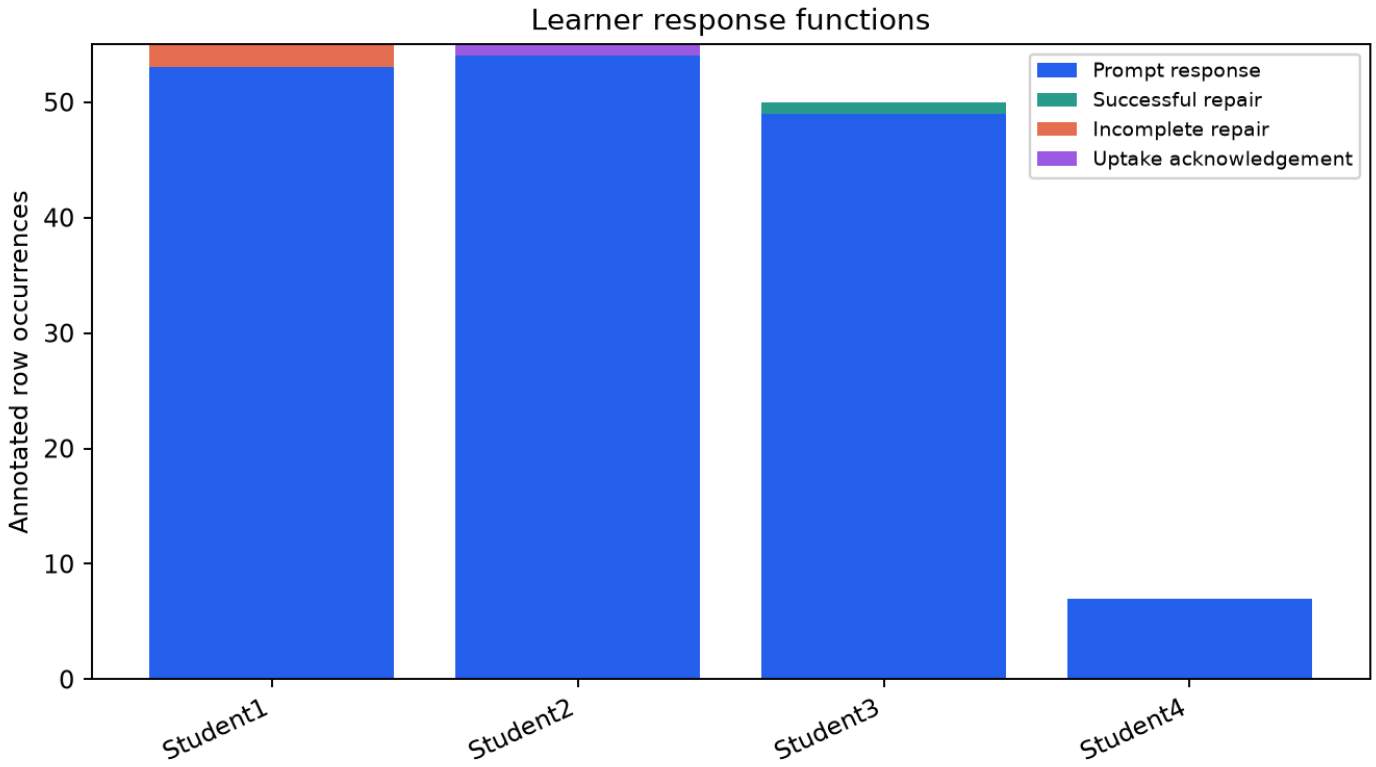

Error incidence

Error types

Response and uptake

CSLA label glossary

Short definitions of the supplied annotation codes. Classroom-event labels and learner-error labels are independent.

Code	Full name	Short definition
`P:I`	Instructor instruction	Directs or assigns learner production.
`P:IQ`	Instructor information question	Requests information or an answer.
`P:CQ`	Instructor clarification question	Requests clarification outside corrective feedback.
`F:EC`	Explicit correction	Overtly supplies a corrected form.
`F:R`	Recast	Reformulates learner production without overt correction.
`F:CR`	Clarification request	Signals a problem and requests clarification.
`F:EL`	Elicitation	Invites learner to supply the target form.
`F:MF`	Metalinguistic feedback	Comments on a language form or rule.
`F:CC`	Confirmation check	Checks an interpretation or form.
`F:Pr`	Praise	Positively evaluates learner performance.
`F:Ack`	Feedback acknowledgement	Acknowledges or repeats an accepted learner form.
`F:NE`	Negative evaluation	Marks production as incorrect without supplying a correction.
`A`	Instructor answer	Answers a learner question.
`RN`	Instructor reaction	Responds to content rather than linguistic accuracy.
`CM`	Classroom management	Organizes participation, logistics, or technology.
`CoM`	Conversation management	Regulates conversational flow or backchannels.
`PR`	Prompt response	Learner responds to a prompt or task.
`SP`	Student prompt	Learner initiates an interaction.

SP:I	Student instruction	Learner directs an action.
SP:IQ	Student information question	Learner asks for information.
SP:CQ	Student clarification question	Learner asks for clarification or assistance.
R:S	Successful repair	Learner resolves a feedback-targeted problem.
R:IR	Incomplete repair	Learner attempts but does not complete repair.
R:Ack	Uptake acknowledgement	Learner acknowledges feedback without reformulation.
R:NR	No uptake	No uptake before the interaction moves on.
UNK	Unknown	Function cannot be determined reliably.
Er:G	Grammar error	One observable grammatical error.
Er:L	Lexical error	One observable lexical error.
Er:M	Multiple errors	Multiple observable grammatical or lexical errors.
Er:EU	English utterance	Substantially English when Spanish is expected.

Evidence examples

Learner-error rows

> Sentence 1 | 00:00:00.000 | learner | Student2 | PR Er:M
>
> Estás pidiendo a.

> Sentence 4 | 00:00:07.490 | learner | Student2 | PR Er:M
>
> No más 1.

> Sentence 47 | 00:01:56.600 | learner | Student1 | PR Er:L
>
> Est estrategias de mercadeo hacia los latinos en los Estados Unidos.

> Sentence 59 | 00:02:17.840 | learner | Student3 | PR Er:G
>
> Los es.

> Sentence 69 | 00:02:40.190 | learner | Student2 | PR Er:M
>
> Pues 1 tiene?

> Sentence 70 | 00:02:40.190 | learner | Student2 | PR Er:L
>
> Está usando el spanglish, porque tiene faster than igual.

> Sentence 71 | 00:02:40.190 | learner | Student2 | PR Er:L
>
> Una flying Chancla está dirigido a la

Feedback rows

> Sentence 2 | 00:00:03.920 | instructor | Instructor1 | F:MF
>
> Sí es como no es firma.

> Sentence 3 | 00:00:03.920 | instructor | Instructor1 | F:MF
>
> Es como un.

> Sentence 48 | 00:02:03.290 | instructor | Instructor1 | F:CR
>
> No es.

> Sentence 50 | 00:02:05.710 | instructor | Instructor1 | F:EL

> Y la.

> Sentence 52 | 00:02:06.580 | instructor | Instructor1 | F:EC
>
> Estrategias.

> Sentence 56 | 00:02:09.860 | instructor | Instructor1 | F:Pr
>
> Muy bien.

> Sentence 60 | 00:02:18.400 | instructor | Instructor1 | F:Ack
>
> Dos publicidades.

Uptake rows

> Sentence 51 | 00:02:06.130 | learner | Student1 | R:IR
>
> Es como.

> Sentence 53 | 00:02:08.139 | learner | Student1 | R:IR
>
> De este.

> Sentence 237 | 00:13:09.350 | learner | Student3 | R:S
>
> A realizar una compra, pues depende de su segmento socioeconómico.

> Sentence 328 | 00:18:56.900 | learner | Student2 | R:Ack
>
> Yeah.

Reproducibility
